

Suggested Discussion Questions for Each Lesson

These are some questions that others have found useful. As you discuss the questions in a group, try to cite specific examples from the video to substantiate your ideas.

1. What is the content of the lesson? What mathematical tasks are posed? How are they interrelated?
2. What are the parts of the lesson? How are they sequenced? Why do you think the teacher sequenced them in this way? How are they related?
3. What is the teacher's role in the lesson? What kinds of questions does the teacher ask? What information does the teacher provide?
4. What is the students' role in the lesson? What are the students doing during the various parts of the lesson?
5. What is the teacher's goal? What does s/he want students to learn from the lesson?
6. What are the students learning from the lesson? How can you tell?
