

{Exit to NE High School}
Student - "I am only a body doing a job"
Teacher - "We are very successful at NE High"

Northeast High School is like a maze from when they enter in 9th grade to when they graduate in 12th grade. There is only one path to be a successful American in today's society. The students can attempt to have their own individuality while at NE High but each attempt will be thwarted by a "dead end" In the end the school deems itself successful by having students be "only a body doing a job" when they are able to get out of the maze.
